UNeedIT Converter is a lightweight software application developed specifically for helping you carry out conversion tasks between different units of measurement, such as memory, time, length, velocity, and temperature. Easy-to-decode layout It takes nothing more than a quick and simple installation process in order to get access to the tool's GUI. The GUI looks straightforward so you are not going to spend a lot of time wondering where to get started. You cannot appeal to a help manual to read more about the setup process. However, you can decode the dedicated parameters on your own because they look highly intuitive. Unit conversions UNeedIT Converter gives you the possibility to work with different units of measurement which are grouped in several categories, namely memory (e.g. bytes, kilobytes, gigabytes), time (e.g. milliseconds, seconds, minutes, hours), length (e.g. centimeters, inches, feet), weight/mass (e.g. milligrams, grams, ounces), velocity (e.g. feet per second, meters per second), and temperature (e.g. Celsius, Kelvin, Fahrenheit). A multi-tabbed environment is implemented for helping you quickly access each conversion category on the fly and switch between them. The best part about working with this program is that the conversions are automatically performed as soon as soon as you enter a custom number or paste it from the clipboard. In addition, you are allowed to copy data to the clipboard so you can quickly paste the results in other third-party programs. Tests have pointed out that UNeedIT Converter carries out tasks quickly and without errors. It remains light on system resources so the overall performance of the computer is not hampered. You may keep it running in the background. Features: General: The best part about working with this program is that the conversions are automatically performed as soon as soon as you enter a custom number or paste it from the clipboard. In addition, you are allowed to copy data to the clipboard so you can quickly paste the results in other third-party programs.
