AutoLISP is an extension to the powerful programming language LISP that was originally developed at MIT in the 1970s for artificial intelligence (AI) and to write macros for the drawing programs developed by Seymour Papert. Figure 1-1 shows how the default LISP editor looks like. The LISP editor contains two lists, LISP source and LISP output. LISP source contains all the commands in the code. LISP output contains the result of executing the commands in LISP source. \*\*Figure 1-1\*\* LISP editor
