Generator can't connect to your blog to determine the exact number of pages that need to be indexed, so it's up to you to enter either the exact number of posts or an estimate that you think is sufficient. Only the number of pages you enter are added to the sitemap. So, if you're looking for a fast and reliable way of indexing your blog and generating a sitemap, then you can considerBlogger Sitemap Generator. The BRIDGES tool is a standalone sample framework that opens the door to creating your own custom BRIDGES for any number of filters or any number of parameters that you specify. There is no database requirement and no limits on how many parameters can be specified.

Most BRIDGES contain a number of common inputs for basic data validation and address various settings, such as encryption or tokenization. You can use the BRIDGES framework to create your own BRIDGES, build validation, encryption and tokenization rules, as well as to create a webservice that can be consumed by BRIDGES. You can consume a BRIDGES in a web service, email message, QuickBooks, or Excel spreadsheet. This BRIDGES-CSV module will connect to an existing QuickBooks Enterprise Solutions Company with your BRIDGES

System Requirements:
