Beatmania IIDX 17: Sirius is the 17th installment in Konami's Beatmaniaseries of music video games.

The main motif of Sirius's UI is astronomy, as the game is named after Sirius, known to be the brightest star in the night sky. Public location tests began on May 27, 2009, and the game itself was released on October 21, 2009. The main gameplay of Sirius is similar to previous games, as it consists of performing musical notes to play songs in a back beat fashion. This is achieved through

the use of a controller, a combination of seven buttons, a turntable, and the ability to spin the controller's turntable for performing scratching. If no note is played within the specified time limit, the gauge is automatically filled and, if the gauge is half full, the note fails, and the gauge is then reset to 0. Failing to do so depletes the gauge until it is empty, abruptly ending the song. When

Sirius is first played, the player is greeted by the introduction of the game, before proceeding to select the song "Fisherman's Horizon". Once the selected song starts, the player is given a select page, titled Kami-sama (Godfather), where they can choose the difficulty, the song's key, the song's record, and the song's base grooves. The default difficulty is four stars and the key is D-sharp Major. Beatmania IIDX has received a positive response since its release in 2007, being as popular as series

such as the Rockmanseries.note Because the game has a large and devoted player base in Japan, as well as the worldwide game hardware market, the GameCube release, Beatmania IIDX 3rd Mix, was developed around the feedback received from the previous game, Beatmania IIDX 2ndMix. The development team opted for the "retro-remix" philosophy, enhancing a game with new effects and gameplay mechanics that retain the essence of a past game. In addition to the original gamemode, Beatmania IIDX 3rd Mix includes Party, a new game mode from the perspective of a group of people gathered to play the game, and Starlight Field, a new game mode that requires the player to line up

the right notes before they are played. Starlight Fieldwas only released in 2009 as a part of Beatmania IIDX 3rd Mix. The game also includes a graphically enhanced interface and improved sound quality that was produced for the GameCube version.note TheBlu-ray Disc Disc version of the game uses DVD subtitles and a broadcast quality soundtrack and while thePS2version is completely enhanced, it does not include the music videos from the GameCube version.
