## **Ragnarok Guild Emblems Download [HOT]**

# Download

you are here: legend of mana: customizable guild emblems a torrent is a data transfer protocol. the more seeds it has, the faster the download. as you seed, you increase the number of peers you have. your are now sharing your bandwidth with the rest of the peers. if your ratio is 100/0, that means you are uploading 100% and downloading 0%. if your ratio is 0/100, that means you are uploading 0% and downloading 100%. if you have a ratio of 70/30, that means you are uploading 70% and downloading 30%. (but your peers are

uploading 70% and downloading 70%, so it's really a 50/50 split of upload/download). first thing you need to do is go to the site directory and start making the "guild emblems" guild. you will need a logo image and a description to go along with it. go to the directory that contains your logo and choose the logo and then choose the picture description. then choose where you want the picture to be. now you need to select the area where you would like to show your emblem on the website. if you are just making a custom guild emblem you will need to change the "display" box to "custom" and then you can edit the size. next thing you will need to do is to edit the description for the emblem. if you are just making a custom guild emblem you can just make a description of what it is and then leave it blank and you can use it as the description. rones could be a little bit tricky for you guys but i would like to make it easy for you. i'm going to post many different guild emblems in one picture. this is to save me both work and time. all you have to do is right click, copy and save it to your pc. after that open any art or picture program you use and single out the emblem you want to use for your guild. remember to save the file as bmp format. if this is your first time using guild emblems, go to your ragnarok folder and create a new folder named emblem. inside the emblem folder is where you want to add in all your guild emblems.

guild emblems are basically the main way that guilds represent themselves. you can make emblems that say your guild's name, and use the titles that you have made. for example, i have the title moon wizard. that means that my guild can be represented by the moon wizard. i also have titles like silver and gold. those are the titles that i have made for my guild. another thing i can do is add a description to the emblem. this is also how you can tell who is in your guild. now, you're going to have to copy the emblems into a picture program. once you have all the emblems saved, you need to put them into a folder. you need to have a folder called emblem. inside this folder, you have to save all of your emblems as.bmp files. for the credits i give thanks to the following people: henry b. roesch, data/art/architecture design, beta lead for the beta test guild/guild
