Vendor (Appbox) has discontinued support for Windows Phone. In case you have experience with the app, we would love to learn from your side of the story. Similar-style UI and powerful features make the Microsoft Outlook Mobile app an excellent choice for users on Windows Phone. Its Calendar feature

allows you to see all the appointments in your calendar and also set reminders to them. The e-mail client in the app lets you easily reply to incoming messages and send attachments, and also get help via the integrated assistance window. The Contacts and Calendar sections in Outlook Mobile are very easy to use. You can find the respective entries by tapping the search box next to the required section. One of the best features of the app is the ability to search for contact entries within it. Tap the magnifying glass icon within the Contacts section to activate this feature. Afterwards, tap on the Search box that's present in the app. Next, enter the contact name and tap the Search button. The contact details will be displayed in a list on the screen. SpyHunter is an ultimate anti-malware/anti-
spyware that works as a utility to remove
malware, remove spyware and increase your
computer's overall performance. The main
advantages of the application include being a
cross-platform anti-malware/anti-spyware,

removing even the most stubborn malware, being relatively easy to use and working with almost any PC. What makes the program better than other anti-malware programs is that it also comes with a unique form of detection that consists of detecting suspicious processes and objects on the computer, or in other words, all the malware found on the PC will be automatically removed from your machine. SpyHunter also allows you to restore and clean the registry for safe and swift startup. You can also find a built-in registry cleaner, optimize your system's registry to remove harmful errors and improve system speed. Additional features include being able to automatically remove known malware and spyware (even if the malware doesn't show up in any security software), a task scheduler and a system

information tab that displays information on your computer's hardware. The program comes with both a free and paid version, but the latter is also available for Windows XP and Vista.
