WiFi Password Decryptor is a Wi-Fi Network password cracker utility developed by EASYsoft Inc. The program was created to help users retrieve WiFi password keys stored in the Windows Wireless Configuration Manager (Windows WCM) panel. The password checker is able to reveal hidden passwords stored in protected wireless networks. You can find the hidden keys with just one click. The program allows you to check all 802.11 networks that are listed in the WCM panel and the list can be exported to any format, including the TXT, HTML and XML files. WiFi Password Decryptor supports the Windows 2000, XP, Vista and 7 OS. WiFi Password Decryptor can only decrypt Windows WCM passwords, so it cannot hack security information of WPA and WPA2 networks. The tool automatically checks for hidden wireless networks (when accessing any network, you will be asked to log in by entering the WiFi Password). WiFi Password Decryptor does not need any third-party tools, such as Wi-Fi WEP or WPA cracking softwares, to crack the wireless network passwords. Simply download and install WiFi Password Decryptor to find the WiFi network passwords and reveal them in the Windows WCM panel. WiFi Password Decryptor is free to try, but you need to register for free to use its full functionality. How to Use WiFi Password Decryptor WiFi Password

WiFi Password Decryptor is an effective tool to help you recover all those lost passwords. WHISPER WHISPER is a very simple app. It just collects your phone's radio noise, and show you a day/night noise level graph. WHISPER shows information only once you enable it. First thing first, there's nothing to do to enable the Whisper. You will see a pop-up window where you can tap "Enable Whisper" to turn on the app's functionality. Alternatively, you can access the app's preferences in the app's settings menu. WHISPER's app displays the current noise level at the top-left corner of the frame. The radio noise level appears as a colored bar on the right side of the screen. You can tap the bar to compare the radio noise in the past and present, and you can make a note of the noise level. The daily graph shows an average daily noise level on the left side of the frame, and the daily details on the right. If there's no graph, the frame will be blank. There's no map in the app, but there's a list of your favorite locations you can add from the map. The noise level graph is color-coded by day. WHISPER's daily graph can be configured by the user with settings, a couple of which are displayed on the screen. There's a toggle for the daily graph. The graph is saved on the phone, and can be shared to Facebook, Twitter, e-mail and other social media. WHISPER is pretty basic, but it's really cool. It's not your typical app. It's free and you can get it in the Android Market. WHISPER Video Guide WHISPER Description: WHISPER is a very simple app. It just collects your phone's radio noise, and show you a day/night noise level graph. WHISPER shows information only once you
