- 3. Swap Mode:** Swapping the originals and the copies are a tedious process, especially when the originals are too large in size. This mode allows you to hide the originals and copy the same picture of the same size. So, remove unwanted elements from the picture.
- 4. Resize Aspect Ratio:** All the graphic designers prefer cropping the big images because this would make things easier for editing and make the design look different. But cropping is a time-consuming process. So, Resize Aspect Ratio helps users to crop the big images with a specific ratio.
- 5. Perspective Warp Tool:** The Perspective Warp tool allows you to create a 3D-like image by following the shape and angle of an object in the picture. You can rotate the picture around different axes that the object is located in the image.
